# EASYMILL
The ultimate CAM software for the shop floor!

EASYMILL, the EASY CADCAM solution

EASYMILL is a software assistant that will increase your machines running time. EASYMILL will enable you to program easily, off line, your lathe or milling machines regardless of their own specificities.

You can get your program either from CAD files or from a paper drawing very efficiently.

EASYMILL will provide flexibility in the workshop : everyone will be able to program and use any machine thanks to the configurable post-processor.

A New and Revolutionary concept for 2D Contour Drawing, the ...

Magic Tool Bar !

Automatic visual alignments and anchoring using mouse or keyboard constraints...

Quick and easy to use

EASYMILL is easy and quick to install.
Quick calculation of tool paths.
Programs are written and checked easily and in a few seconds while your machines are running increasing your productivity.

With EASYMILL no need for a «solid » 3D part to write a program. No long and complicated constructions. You don't even need to draw your part in order to machine it.

Some advantages and features of EASYMILL

You can test EASYMILL for free before purchasing.
No training required. You can machine as soon as EASYMILL is installed.
FREE demonstration videos.

New and Revolutionary concept for 2D contour Drawing.
Numerous manufacturing sequences : pocket with or without island, re-roughing, lots of holes machining options(drilling, boring, tapping, countersinking, reaming, thread milling, contouring, etc …)

Automatic feed modulation.
Automatic filleting or chamfering of sharp corners.

Engraving of text with all Windows True Type fonts.
Engraving of images or photographs.

Standard CAD Interfaces.

Ramping on profile.
Machining of surfaces in U or V.
3D contouring.
4/5 Axis Indexation.
STL files machining

… + a lot more features, you should try by your self.
